

I support my local K-Love Station. Here in central Kansas K-Love provides a music choice no other station offers, provides national and international news, along with local forecasts. A change in status would deprive me of these services. K-Love is a community service because of the type of service--i.e. from a perspective. I can listen to any number of talk, news, or secular stations; but K-Love provides me with the only broadcasting of its type in my area. Thanks for considering my comments.
